List is ranked by the Annual Quality Mean (column 2) from best to worst quality.

* To determine if ratings between two varieties are truly different, subtract the lower rating from the higher one. If the result is greater than the LSD value for that column, then the difference is real.

All data is a mean of three replications.

All ratings are on a scale of 1 to 9 (1 = dead, 9 = Ideal, 5 = acceptable).

Trial planted September 2003.

Bardot, EWTR, Tiger II, IS-AT 7, SR 7150, PST-9NBC, PST-9VN, SRX 78122, SRX 7EE4, and SR 7100 are colonial bentgrass (*Agrostis capillaris*). SR 7200 is velvet bentgrass (*A. canina*). All others are creeping bentgrass (*A. stolonifera*).

SRX 78122, SRX 7EE4, SR 7200, and Sr 7100 are unofficial entries.
